About **BUHLMANN GROUP**

BUHLMANN GROUP is a premium trading house for steel pipes, pipe connecting elements and pipe accessories as well as a pipeline and plant engineering full-service provider. The group offers worldwide premium solutions and regards its customers as partners. The group includes the German **BUHLMANN Rohr-Fittings-Stahlhandel GmbH + Co. KG** with headquarters in Bremen, the Dutch **DYLAN Beheer B.V.** from Oud-Beijerland near Rotterdam and **BUHLMANN-PROJECT-SOLUTIONS GmbH (bps)**, located in Cadolzburg near Nuremberg, Germany. As a trading house dealing in first-class quality products, **BUHLMANN GROUP** holds all the relevant certifications compliant to national and international standards in quality management (EN ISO 9001:2008), environmental protection (EN ISO 14001:2004) and health and safety at work (BS OHSAS 18001:2007). **BUHLMANN GROUP** currently employs more than 700 staff in 17 countries around the world. Independent subsidiary companies are located in the countries of Belgium, Germany, France, the Netherlands, Austria, Russia, Spain and the United Kingdom, as well as in the United States of America and Mexico. In addition, Asian subsidiary companies are located in China, Singapore, Thailand and the United Arab Emirates.

Founded in 1945, **BUHLMANN Rohr-Fittings-Stahlhandel GmbH + Co. KG** has been a reliable partner for customers worldwide for over 70 years. With a warehouse capacity of more than 55,000 tons across 130,000 square metres of floor space in nine warehouse locations, the company is one of the largest warehousing traders in Europe. Customers primarily from the power, petrochemicals, chemicals, and oil and gas industries as well as nautical and mechanical engineering, place their trust in high-quality products in any given standard and grade, which is what **BUHLMANN** stands for. In addition, the company possesses extensive consulting, project management and logistics expertise and offers its customers full-service solutions from a single source. In addition to the German branches in Burghausen,

Chemnitz, Duisburg, Hilden and Mannheim, the company also runs local offices to service its customers in Finland, Italy, the Netherlands and Turkey.

Founded in 1981, **DYLAN** is well-known in the Benelux countries as a specialist dealer for the petrochemical and process chemicals industry, power and offshore industries. 10,000 tons of warehouse stock in steel pipes, fittings and flanges are offered in all sizes and materials. The Dutch company has a broad range of low-temp and high-yield carbon steel grades, as well as stainless steel grades from austenitic to duplex compliant with ASTM and EN standards and non-ferro grades such as copper and nickel (super)alloys. The Special Steel department specialises in products such as bars, rings, discs, all types of forgings and flanges, and offers tailor-made solutions at fair prices and short lead times. With **NRG Special Products**, **DYLAN** also has a mechanical production for components with CNC milling technology. **NRG Special Products** offers its customers even greater productivity, reliability and precision with its Hankook VTC125E vertical turning centre.

BUHLMANN-PROJECT-SOLUTIONS GmbH (bps) is an industrial full-service provider for pipeline and plant engineering in the fields of power, process engineering, oil & gas, engineering and offshore. The wholly owned subsidiary of **BUHLMANN GROUP** develops industrial pipeline engineering planning and project management solutions in line with current international standards and adapted to individual customer specifications. Global delivery, prefabrication and installation of complete pipeline systems and plant components is included. The 3,200 square metre production hall, with a crane capacity of 54 tons in total, also enables **bps** to manage large-volume production orders. In terms of mechanical CNC fabrication, **bps** has specialised in the production of pipe connecting elements, flanges and custom parts of all kinds as an AD WO licensed manufacturer. In addition, **bps** has its own heat treatment facilities, such as an annealing furnace.
